To Whom It May Concern:

I would like to write this letter on behalf of Arthur House.

I have known Mr. House professionally for several years and have worked for him as an Electrical Contractor wiring the building in Lempster, NH, known as the Dartmouth College Highway Plaza.

In all cases, I have found him honest, straightforward and above all, professional. I have worked in the building trades for more than fifteen years as a contractor and as an engineer, and find Mr. House as easy and straightforward to work with as anyone I have dealt with.

Mr. House has always paid me promptly. We happen to be working under an A.I.A. contract on this job, but I would gladly work for Arthur on a verbal agreement only.

If there is anything further I can contribute in support of Arthur House, or comment on certain other work that has been done at the Lempster building please feel free to call on me.

Sincerely,

Victor Reno, PE, KLR Engineering
